PROFESSIONAL SUMMARY

Senior Full Stack Engineer with **7 years** of experience building production web applications with React, TypeScript, Next.js, Node.js and Python, currently shipping LLM-powered features on Docsumo's AI intelligent document processing (IDP) platform. Builds human-in-the-loop interfaces that let users review, correct and trust AI output, plus guardrails around LLM-generated code. Works agent-first every day, using Claude Code, Codex, MCP servers and custom agent skills to plan, write, test and review code. Has led teams of up to 10 engineers and delivered 50+ full stack projects, including the Election Commission Nepal platform. Experienced in asynchronous work on distributed teams.

TECHNICAL SKILLS

AI & LLM	LLM integration, prompt engineering, structured output validation, human-in-the-loop review, LLM code generation, intelligent document processing (IDP), OCR
Agentic Development	Claude Code, OpenAI Codex, AI coding agents, Model Context Protocol (MCP), custom agent skills, agent-assisted code review and testing
Frontend	React, Next.js, TypeScript, JavaScript, Redux Toolkit, Reselect, Zustand, Vue.js, Nuxt.js, React Native, TanStack Virtual, design systems
Backend	Python, Django, Node.js, NestJS, Express, AdonisJS, PHP, Laravel, REST APIs, GraphQL, Socket.IO, Kafka
Data & Cloud	PostgreSQL, PostGIS, MySQL, Redis, Elasticsearch, Apache Solr, AWS, Microsoft Azure
DevOps & Tools	Git, GitHub, GitLab, CI/CD, Docker, Linux, Jira, Vercel
Practices	System architecture, database design, Playwright (E2E), unit testing, code review, technical leadership, mentoring

PROFESSIONAL EXPERIENCE

Senior Software Engineer | **Docsumo** **Jan 2025 – Present**
Kathmandu, Nepal | AI intelligent document processing SaaS

- Lead frontend development of Docsumo's AI-powered intelligent document processing platform, which enterprise clients use to extract data from invoices, bank statements and other financial documents with ML and LLM models.
- Develop Python backend services and REST APIs for the review and workflow features, including document-handling logic for Excel and spreadsheet files, shipping features end to end across frontend and backend.
- Built the document review and validation workflows around ML/LLM extraction so users can verify, correct and approve AI output, reducing manual data entry for clients by **about 80%**.
- Shipped LLM product features, including context-aware field extraction and smart auto-suggestions in the review screen.
- Designed and built guardrails for LLM-generated code in the no-code workflow builder: manual-edit tracking, diff and merge review, "Edited manually" badges and confirmation dialogs, so regenerating code never silently overwrites a customer's custom logic.
- Built a reusable design system of **50+ React and TypeScript components**, cutting feature delivery time by **about 40%** and keeping the UI consistent across products.
- Made the heaviest document views **about 60% faster** with list virtualization (TanStack Virtual), lazy loading and memoized Redux/Reselect and Zustand selectors.
- Built spreadsheet (Excel) review tooling, including a cell-mapping widget that links extracted fields to their source cells.
- Use Claude Code and Codex with MCP server integrations daily for agentic code generation, refactoring, debugging and code review; mentor junior engineers on code quality, testing and modular architecture.

Senior Software Engineer I | **YoungInnovations** **Aug 2021 – Jan 2025**

Lalitpur, Nepal | Software development company

- Promoted from Software Engineer to Senior Software Engineer I; led delivery of **8+ full stack projects** with teams of **up to 10 developers**, from requirements to release.
- Owned system architecture for each project: flow and block diagrams, database schemas and API design.
- Built the Election Commission Nepal platform (Laravel, React, TypeScript), a multilingual site with a custom CMS that served citizens nationwide during elections.
- Architected the Climate Change Toy Model, a geospatial hazard simulation platform (Next.js, AdonisJS, PostgreSQL/PostGIS, Mapbox), including a custom Mapbox GL wrapper for React and raster-to-vector data optimization.
- Planned roadmaps and milestones, delegated work, kept stakeholders aligned and led R&D on new product ideas.

Senior Software Engineer (Part-Time) | **Hyteno** **Jan 2023 – May 2023**

Lalitpur, Nepal | E-commerce platform

- Replaced the client's limited Plentymarkets CMS with a scalable custom e-commerce platform built from scratch.
- Built multilingual catalog sync and search/filtering APIs, improving search accuracy by **about 35%** and lifting engagement and sales.
- Delivered an admin dashboard for real-time monitoring and content management (product rankings, blogs, FAQs).

Software Engineer | **KTM Labs** **Dec 2020 – Aug 2021**

Kathmandu, Nepal

- Built React single-page applications and shared component codebases; migrated state management to Redux Toolkit for better performance.
- Built Laravel REST APIs and the frontend API layer.

Junior Software Engineer (Intern to Junior) | **Proxy Infotech Solutions** **May 2019 – Dec 2020**

Kathmandu, Nepal

- Developed full stack web applications with Vue.js, Laravel and MySQL, plus custom WordPress themes.

OPEN SOURCE PROJECTS

- **React Spreadsheet Viewer** *(React, TypeScript, TanStack Virtual, Chart.js):* npm component for viewing and editing Excel/CSV files in a Google Sheets-style UI, with virtualized rendering for 100k+ rows, chart extraction, pivot tables and a formula engine. github.com/SurajMazar/react-spreadsheet-viewer | react-spreadsheet-viewer.vercel.app
- **Trove CLI** *(Go, Cobra):* One CLI for repos, PRs/MRs, issues, pipelines and releases across GitHub, GitLab and Bitbucket, with multi-account support and secure credential storage; shipped via Homebrew. github.com/SurajMazar/trove-cli | trove-website-six.vercel.app
- **srz (_assist)** *(Node.js CLI, npm):* Generates React, Vue, Next.js and Laravel components and pages, with optional TypeScript output; published on npm as srz. github.com/SurajMazar/_assist | npmjs.com/package/srz
- **Visual Resume** *(Next.js, TypeScript, Remotion):* Generates a video resume from a form on the fly using programmatic video rendering. github.com/SurajMazar/video-resume | visual-resume.vercel.app
- **Nepali Calendar** *(Next.js, TypeScript):* Web app for the Nepali (Bikram Sambat) calendar. github.com/SurajMazar/nepali-calendar | nepali-calendar.vercel.app
- **Apache Solr PHP SDK** *(PHP, Apache Solr):* Reusable SDK for Solr commands, schema, config and models, extracted from production search work. github.com/SurajMazar/apache-solr-php-sdk
- **SCORM Implementation** *(PHP, React):* Reference implementation of the SCORM e-learning standard with a React SCORM player. github.com/SurajMazar/scorm-implementation

EDUCATION

Bachelor of Science in Computer Science and Information Technology (BSc CSIT) **2021**

Nepalaya College, Kathmandu, Nepal

Languages: English (professional working proficiency), Nepali (native)
